
At my core, I am defined by resilience, unwavering persistence, and an unyielding sense of dependability — traits of which are the driving force behind my commitment to getting the job done, ensuring that I never shy away from my responsibilities. Speaking of duties, I strongly align with the agile software development school of thought that champions consistent delivery of working software as the primary measure of progress, a result-oriented ideology that carries an undertone of user satisfaction.

EDUCATION

- **Vilnius University** 2023
Master, Informatics
- **The University of Georgia** 2020
Bachelor, Informatics

EXPERIENCE

- **Junior Web Developer (Laravel, React)** Feb. 2019 - Mar. 2020
University of Georgia - Internship Tbilisi
 - Development of web and api services in an MVC architecture using Laravel.
 - Leveraging ReactJS to create interactive and intuitive user interfaces.
 - Utilized Redux for application state management.
- **Web Developer (Laravel, React)** Sep. 2019 - Aug. 2021
GloSPACE Logistics - Contract Tbilisi
 - Database/Application Designing
 - Digital invoice development
 - Content management systems development
- **Web Developer (React(Typescript)/Redux, NestJs)** Aug. 2020 - Nov. 2021
CarCar UAB - Contract Vilnius
 - Development and maintenance of React components
 - Redux state management
 - Creation and consumption of REST APIs
 - Production and consumption of messages to and from RabbitMQ
 - Container-based development with Docker
 - Micro-services
 - Integrated testing
 - MongoDB/MySQL
- **Frontend Developer (React(Flow)/Redux)** Nov. 2021 - Jul. 2022
TGLab UAB - Full time Vilnius
 - Transforming web designs to code
 - Widget-oriented development of sportsbook components
 - Representation of live-event changes using websockets
 - Consumption of REST APIs
 - Container-based development with Docker
 - Unit testing
 - MongoDB
- **Fullstack Developer ((React/Redux, Typescript), ExpressJS)** Jul. 2022 - Pres
Kickertech (TGLab Spinoff) - Full Time Vilnius
 - Customer-focused API development
 - Production and consumption of data from Kafka topics
 - Monitoring web app activities in Kubernetes Rancher
 - Representation of live-event changes using websockets
 - Widget-oriented development of sportsbook components
 - Micro-services
 - Unit testing
 - MongoDB/MySQL

DEMONSTRABLE PERSONAL PROJECTS

[See my digital portfolio](#)

- **Transliteration of foreign names into Lithuanian**

Delves in methodologies to adapt a foreign name such as English into the Lithuanian language:

- Vanilla Javascript
- Algorithms Devising
- Decision Trees machine learning classifier
- Python (Flask)

- **Point of Sale Web Application**

The application is built around a micro-service architecture with the following technologies:

- Typescript-React/Redux
- Typescript-ExpressJs
- Python (Flask)
- MongoDB
- RabbitMQ
- React-router

TECHNICAL SKILLS AND INTERESTS

Languages: Javascript, Python, PHP

Developer Tools: Redux dev tools, React developer tools, Docker, AMQP

Frameworks: React, Express, Nest, Flask, Laravel

Cloud/Databases: AWS S3, Cloudinary, MySQL, MongoDB, RethinkDb

Soft Skills: Team player, Enthusiasm for work

Areas of Interest: Software Engineering, Artificial Intelligence, Computational Linguistics

POSITIONS OF RESPONSIBILITY

- **Product Development:** Customer relations during feature development and delivery lifecycle
- **Colleague Assistance,** Giving guidance and support to colleagues
